

Board of Registration for Engineers and Land Surveyors

❖ *Mission and philosophy*

The mission of the Board of Registration for Professional Engineers and Professional Land Surveyors is to protect the public from incompetent, unethical or unlicensed practice of engineering and land surveying and to promote excellence in the practice of these regulated professions.

❖ *Results of outcomes*

The board participated at the national level in the activities of the National Council of Examiners for Engineering and Surveying.

The board has very limited powers to enforce the legislation requiring a license for the practice of engineering or surveying as it applies to non-registrants.

The board often has difficulty investigating and resolving complaints in a timely manner. This is partially due to a lack of full-time investigative staff.

❖ *Strategic plan changes*

No changes have been submitted.

The board has set goals of updating examinations on an annual basis, attending one zone and one annual meeting each year, completing all investigations in 120 days, finalizing all disciplinary actions within one year of initiation of complaint and meeting annually with the professional organizations and societies.
