

## WYLD TECHNOTES : JavaClient 2009

### Toolbar Wizard Changes – from C-Client to Java

C-CLIENT	JAVA
 Add Volumes and Call Numbers  Edit Existing Volumes and Call Numbers	 Call Number & Item Maintenance
 Cataloging Review File	 Review Titles
 Checkin Bookdrop Items	 Discharging Bookdrop
 Discharge/Checkin	 Discharging
 Display1 Invoice	 Review Vendor Invoices
 Display1 Vendor	 Display Vendor (All Cycles)
 Display2 Vendor	 Display Vendor (Specific Cycle)
 Duplicate Existing Title	 Duplicate Title
 Edit Copies Globally	 Global Item Modification
 Edit Existing Authority Records	 Modify Authority
 Link Order Line Holdings to Titles	 Add Ordered Items to Catalog
 Maintain Existing Titles	 Modify Titles
 Modify Item Holds	 Modify Holds for Item
 Modify User Holds	 Modify Holds for User
 New User Registration	 User Registration

 Renew Single Item	 Renew Item
 Renew User Charges	 Renew User
 Search Source	 SmartPort
 Set Options for Item Search	 Configure Options for the Item Search
 Setup and Schedule New Reports	 Schedule New Reports
 User Display	 Display User
	<b>NEW JAVA WIZARDS</b>
	 Add Orderlines* - separated from Modify Order wizard
	 Display Title Holds* - allows display of title holds, which was unavailable in C-client
	 Fine Free Discharge - allows item to be discharged without fine accrual
	 Label Designer – used to create label templates to print spine and book labels
	 Offline Session - Offline module replaces Standalone; this wizard allows configuration for Workflows when there is no access to server
	 Report Session Settings* - allows report viewing/printing configuration
	 Reverse Payment of Invoice* - separated from Pay Invoice wizard
	 Unsuspend User - unsuspend individual suspended users
	 Credit User Account – use to manually created a credit account

For wizards, Java uses: ADD instead of CREATE  
MODIFY instead of EDIT  
DELETE instead of REMOVE

The wizards HOME  and SEARCH  are no longer available. The advanced search functionality, especially the “Combination” search where Boolean operators allow a multi-field search, can now be found in the Item Search and Display wizard, under the new Advanced Search  helper, alongside the Configure Options for the Item Search  helper. (see C-Client Set Options for Item Search wizard above).
